

TRIESTE

Immaginario Scientifico in Trieste is a lively and interactive science museum, where curiosity transforms into knowledge.

Situated in the historic Porto Vecchio, inside the impressive Magazzino 26 building from the late 19th century, the museum covers about 2,000 square meters of exhibition and laboratory spaces, on two floors.

This hands-on museum invites visitors to engage directly with over 100 interactive exhibits. By physically interacting with the displays, visitors can create a personalized and immersive experience. Through experimentation and exploration, it is possible to discover fascinating scientific phenomena and concepts, learn about cutting-edge applications of science, and find out more about the research activities of Trieste's renowned scientific institutions.

With its informal, welcoming, and engaging atmosphere, Immaginario Scientifico is perfect for visitors of all ages, including school groups.

A partnership for the museum

The museum exists thanks to the active partnership of scientific realities and companies in the area, characterized by high levels of innovation: Acegas Aps Amga - HERA Group, SIAD Group, Saipem, Esteco and Sissa Medialab.

The second floor of the museum also sees the support of u-blox.

The museum was also developed with the support of the Casali Foundation, the CRTrieste Foundation and the Pietro Pittini Foundation.

The support of the Ministry of University and Research, the Autonomous Region of Friuli Venezia Giulia, and the Municipality of Trieste is decisive.
